ONTARIO PRODUCTS FOR EXPORT

The Province of Ontario, Canada,
exports to 142 countries. Ontario
exports 80 per cent of Canada's fully
manufactured goods.

Put your confidence in products of the
Province of opportunity.

Benefit from Ontario's hotel/motel
export services program; engineering
services abroad; marketing and advi-
sory services available from

The Marketing Branch

ONTARIO PRODUCTS FOR EXPORT

Published by

DEPARTMENT OF
TRADE AND DEVELOPMENT
GOVERNMENT OF ONTARIO,
CANADA

MINISTER: HON. ALLAN GROSSMAN • DEPUTY MINISTER: D. J. COLLINS

INTRODUCTION

Ontario, Canada's industrial heartland, produces over one half of the nation's manufactured goods and exports to some 140 countries, accounting for over 80% of Canada's manufactured exports.

Ontario offices, situated in 14 key cities in eight countries around the world, are available to assist product buyers to find the right Ontario sources.

Our 1971 Export Directory lists products and the companies which have indicated an interest in selling to international markets.

Organizations interested in products listed are invited to correspond directly with the manufacturer. Special requirements should be sent to the Marketing Branch and appropriate manufacturers will be contacted.

While some agricultural products are included, this directory is not intended to be a food product index. Food enquiries should be forwarded to the Marketing Branch, for detailed service.

Marketing Branch,
Department of Trade and Development,
900 Bay Street, Queen's Park,
Toronto 182, Ontario, Canada.

Telephone: 365-5701

Cable Address: Tradin — Toronto

Part I begins with an index of the Standard Commodity Code. Products are listed by Standard Commodity Code and are followed by numbers assigned to companies interested in exporting that product.

Part II lists the supplying companies in order by assigned number, with the company address and with the name of the contact for export business.

Data compiled with the assistance of the Ontario Statistical Centre.

INDEX OF PRODUCTS

SECTION I — LIVE ANIMALS

Series

- 100 Cattle
- 200 Sheep
- 300 Swine
- 400 Horses
- 600 Poultry
- 900 Other Live Animals

SECTION II — FOOD, FEED, BEVERAGES AND TOBACCO

- 1000 Meat and Meat Preparations
- 3000 Fish and Marine Animals, Fresh, Chilled or Frozen
- 4000 Fish, Smoked or Salted and Smoked
- 5000 Dairy Products, Eggs and Honey
- 6000 Grain
- 7000 Fruits and Fruit Preparations
- 8000 Nuts, except Oil Nuts
- 9000 Vegetable and Vegetable Preparations
- 10000 Sugar and Sugar Preparations
- 11000 Cocoa, Coffee, Tea and Spices
- 12000 Margarine, Shortening and Lard
- 14000 Miscellaneous Foods, Food Materials and Food Preparations
- 15000 Fodder and Feed, except Unmilled Cereals
- 17000 Beverages
- 18000 Tobacco

SECTION III — CRUDE MATERIALS

- 20000 Crude Animal Products, Inedible (except Fibres)
- 21000 Crude Vegetable Products, Inedible (except Tobacco, Fibres and Wood)
- 23000 Crude Wood Materials
- 24000 Textile and Related Fibres (including waste)
- 25000 Metals in Ores, Concentrates and Scrap
- 26000 Coal, Crude Petroleum and Related Crude Products
- 27000 Crude Non-metallic Minerals (except Coal and Petroleum)
- 29000 Waste and Scrap Materials

SECTION IV — FABRICATED MATERIAL

- 30000 Leather
- 31000 Furs, Dressed
- 32000 Rubber Fabricated Materials
- 33000 Wood Fabricated Materials
- 34000 Pulp
- 35000 Paper and Paperboard
- 36000 Textile, Fabricated Materials
- 37000)Broad Woven Fabrics, Narrow
- 38000)Fabrics and Other Fabrics
- 39000 Oils, Fats, Waxes, Extracts and Derivatives, Animal and Vegetable
- 40000)Chemicals and Related Products
- 41000)(Inorganic, Organic Chemicals, Phenols, Ethers, Aldehydes, Ketones and
- 42000)their derivatives, Chemical Products)
- 43000 Petroleum and Coal Products
- 44000 Iron and Steel and Alloys

SECTION IV – FABRICATED MATERIAL (Cont'd)

- 45000 Non-ferrous Metals
- 46000 Metal Fabricated Basic Products
- 47000 Non-metallic Mineral Basic Products
- 49000 Miscellaneous Fabricated Materials

SECTION V – MANUFACTURED PRODUCTS

- 50000 General Purpose Industrial Machinery
- 51000 Conveying, Elevating and Materials Handling Equipment
- 52000 Special Industry Machinery
- 54000 Agricultural Machinery and Implements (except Tractors)
- 55000 Tractors
- 57000 Railway Rolling Stock
- 58000 Road Motor Vehicles
- 59000 Ships and Boats
- 60000 Aircraft
- 61000 Miscellaneous Aircraft (including parts and accessories)
- 62000 Rubber Tires and Tubes
- 63000 Communication and related equipment
- 65000 Heating, Air Conditioning and Refrigeration Equipment
- 66000 Cooking Equipment for Food
- 67000 Plumbing Equipment and Fittings (except Valves, Pipes and Fittings)
- 68000 Electrical Lighting, Distribution and Control Equipment
- 69000 Other Electrical Equipment and Appliances
- 70000 Measuring, Controlling, Laboratory, Medical, and Optical Instruments, Apparatus and Accessories

SECTION V – MANUFACTURED PRODUCTS – (Cont'd)

- 71000 X-Ray and Related Equipment
- 72000 Safety and Sanitation Equipment, Alarm and Signal Systems
- 73000 Service Industry Equipment (including Vending Machines)
- 74000 Furniture and Fixtures
- 75000 Hand Tools and Cutlery (except Table and Kitchen)
- 76000 Other Equipment
- 77000 Office Machines and Equipment
- 78000 Apparel and Apparel Accessories (except Footwear)
- 79000 Footwear
- 80000 Toiletries, Cleaning Preparations and Chemical Specialities
- 81000 Jewellery and Silverware (except Watches and Clocks)
- 82000 Watches and Clocks
- 83000 Recreation Equipment, Toys, Games, Sporting and Athletic Goods, N.E.S.
- 84000 House Furnishings
- 85000 Kitchen Utensils, Cutlery and Tableware (except Silverware)
- 86000 Miscellaneous Household and Personal Equipment
- 87000 Medicinal and Pharmaceutical Products
- 88000 Medical Supplies, Ophthalmic Goods, Orthopaedic Appliances
- 89000 Printed Matter
- 90000 Stationers' and Office Supplies and Artists' Materials
- 91000 Photographic Goods
- 92000 Musical Instruments
- 93000 Firearms, Weapons and Ammunition
- 94000 Miscellaneous Products
- 95000 Containers and Closures
- 96000 Remaining End Products, Classified by Material

airport equipment

With its air traffic doubling every five years since 1945, Canada has developed a singular expertise in building and equipping airports of all kinds.

Much of this growth can be attributed to Canada's very size — at 3,800,000 square miles (9,880,000 km²) second only to the Soviet Union. Canada is also a leading air carrier — second in domestic air travel, third in all air services and fifth in international traffic.

In reaching this position, Canada has met many challenges — in building new airports, in a vast programme of improvement and expansion in existing facilities, and development of many new skills in these fields.

The wealth of experience in airport development this huge expansion has generated is now offered to the world by a group of more than 100 airport engineering consultants, construction companies, electrical and electronic equipment manufacturers and service industries.

The highly developed technology gained by Canadians in building one of the world's most sophisticated national airways systems has been provided to other countries to help build their airports.

In doing so, everything possible has been done to ensure that all equipment designed, built or used in Canada meets the highest standards of quality and fully rates the approval of all international regulatory agencies.

Canadian consulting engineers are registered professional engineers engaged in private practice as sole proprietors, partnerships or firms providing a wide range of engineering services on a fee basis.

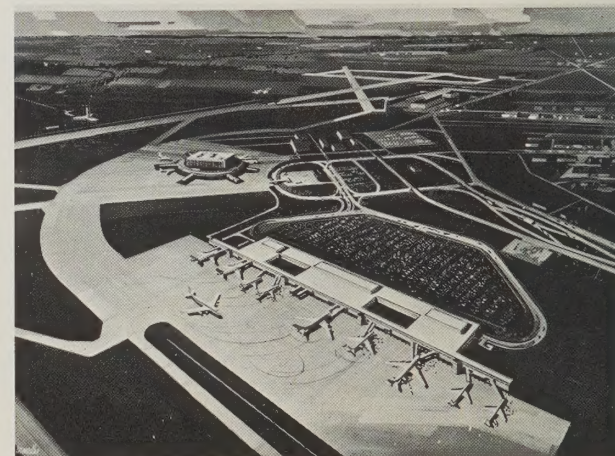

These engineers serve governmental, industrial and commercial clients in a variety of ways, from specialist consultation to complete planning, design and supervision of projects.

With the highest standards of ethics and efficiency, and experience in more than 30 countries, in climates varying from arctic to equatorial, Canadian consulting engineers offer a wealth of skills to serve airport development needs everywhere.

Vancouver International Airport is the newest of Canada's Jet Airports. It is served by a dozen commercial carriers and was opened in September 1968. Over 2 million passengers are handled per year. The latest of jet age facilities permits the airport to grow with the future.

The airport terminal building was constructed by the **Foundation Co. of Canada Ltd.** as general contractor.

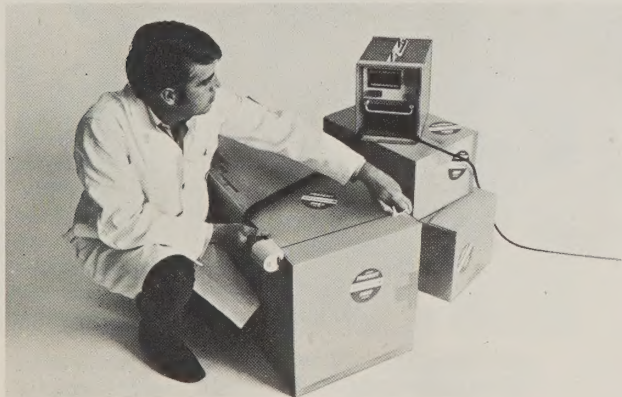

The original aeroquay was constructed by **Foundation Company of Canada Ltd.** when opened in 1962, it represented the latest in airport design and facilities.

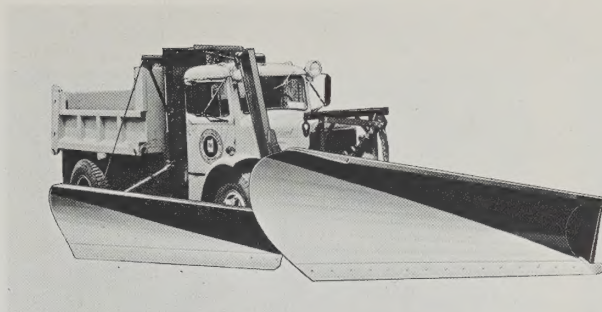

Cansult Ltd. a consortium of Canadian consulting engineering firms offers extensive experience in all phases of airport planning and engineering including feasibility studies, surveys, site selection, detailed design and supervision of construction. The group makes available composite staff of some 1200 engineers and technical personnel. Services extend from initial surveys, soil testing and runway design, through terminal building architecture and engineering to all navigational aids and communications.

At ABU DHABI in the Arabian (Persian) Gulf **Cansult** contracted planning, design and supervision of construction for the complete airport including runways, taxiways, terminal building, navigational aids and all other services.

CAE Industries Ltd. offer the VOLUMETER for instant accurate volume and volume-weight measurements.

Frink snow-plows have developed over forty years of experience and are recognized as standard for the industry.

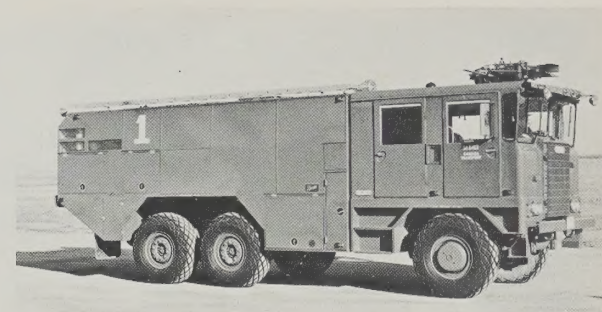

Foundation of Canada Engineering Co. Ltd. (FENCO) working in co-operation with the Canadian D.O.T. undertook the planning and design of an international airport terminal building at KATUNAYAKE, CEYLON. This project is an all-weather facility, equipped with telecommunication and other navigational and visual aids. The airport, with terminal facilities to process 250 passengers per hour, serves primarily large jet aircraft.

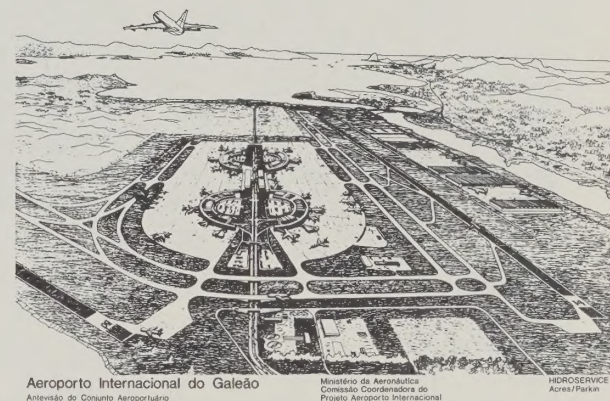

British American Construction & Materials Ltd. constructed the runway extension and overlay 11,050 feet long by 150 feet wide. The runway system is complete with overshoots 200 feet long, paved shoulders 25 feet wide and taxiway providing access to the new parking apron which is 700 feet by 400 feet.

Other installations include high intensity runway lighting, taxiway and apron lighting and power distribution systems.

FENCO has been active in airport projects in Brazil, Western Samoa, East Africa, and Andorra.

Fire and crash-rescue trucks are manufactured by **Sicard** using this heavy 6-wheel drive vehicle and **Pyrene** fire fighting equipment which can discharge over 3600 litres of fire killing foam.

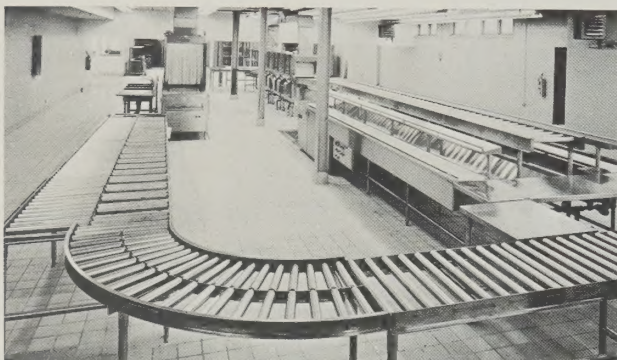

ACRES CONSULTING SERVICES LTD., formed in 1924, has an extensive background in consulting services, planning, engineering, project management and construction supervision.

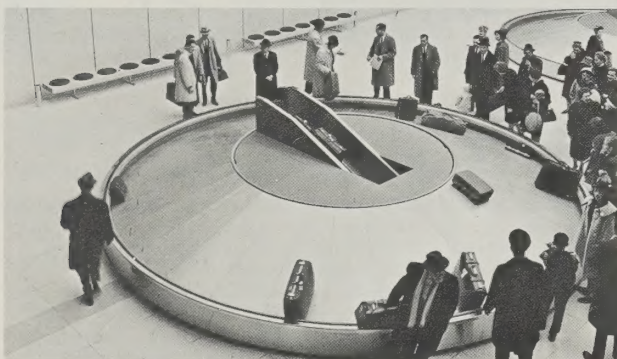

Acres' activities encompass feasibility studies; geotechnical studies; site engineering; communications; mechanical and electrical design; systems analyses; traffic studies; construction management. Acres has provided engineering services for capital construction works involving an investment of over \$3 billion. In the international field, the company has had substantial experience in Latin America, Africa and Asia. The total staff of the group exceeds 1,200.

The **Lely** precision spreader of de-icing agents on runways features accurate metering, wide swath and low maintenance.

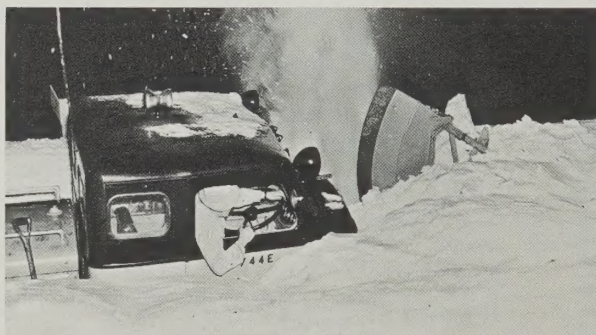

Crown Steel Products supplies in-flight kitchens and airport terminal catering equipment. Illustrated are parts of a stripping and wares wash unit with automatic dishwashers.

Mathews Conveyor Co. Ltd. manufactures a wide range of luggage-handling equipment including the world-famous **CARROUSELS** of which 268 have been sold throughout the world. It is considered the most efficient method of handling luggage for all large aircraft including the Jumbo Jets.

Skykeesh offers prefabricated ATC tower cabs for emergency, low medium and high air traffic control. The photo illustrates a tower nearing completion at MARACAIBO, Venezuela. Several models are offered including portable and 2-man cabs which can be erected by 3 men in one day — easily moved from one site to another.

Sicard has been designing and building snow-blowers in Quebec since 1927, where an 8-feet (2.4 meter) annual snowfall is normal. **Sicard** also makes runway sweepers and aircraft towing tractors.

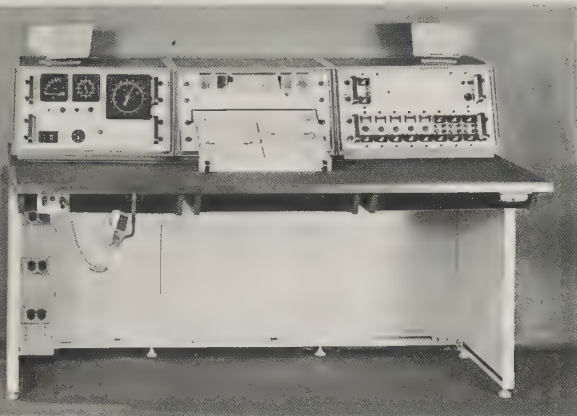

Canadian Westinghouse Co. Ltd's. Rampliter Luminaires provide maximum efficiency in night time flight preparation at modern airports. All types of building lighting fixtures and electrical equipment are offered by Canadian firms. (Air bridge by Rob't Mitchell Ltd.)

Air Traffic Control Tower at Toronto International Airport, showing **Raytheon** Bright Radar Display in foreground. **Raytheon** also supplies S.S.R., Digital Information Display Systems, D.M.E. and VOR Ground Systems, and is foremost supplier of A.T.C. systems to the Canadian Government.

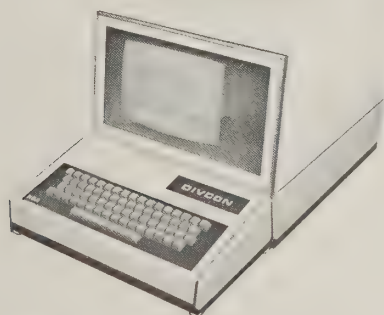

Airport Visual Aids

Canada can supply all requirements in the field of visual navigational aids, to ICAO requirements manufactured to meet D.O.T. or F.A.A. specifications. Included are approach, center line, runway markers, touchdown, taxiway lights, beacons, vasis, obstruction lights, transformers, regulators, frangible towers and wire and cable.— Installation is done when specified, by contractors with international experience. Turnkey projects and engineering services available.

Philips Electronics manufactures Airport Control Tower Consols with modular form of electrical and mechanical assemblies, all solid-state electronics and provision for simple, rapid installation and maintenance. These consoles are in use in North and South America, Africa and Asia.

Philips also manufacture solid-state Instrument Landing Systems to ICAO category II with automatic changeover and simplified modular construction.

RCA Victor Co. offers the DIVCON display system for passenger information announcements of arrivals, departure, and cancellations — black and white or colour. DIVCON generates letters, numbers or symbols directly from teletype, punched tape computer or keyboard, and displays them in any number of conventional TV monitors.

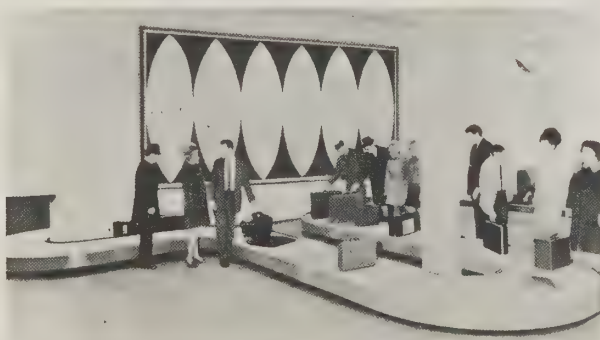

Canadian Westinghouse Co. Ltd. offers the WAND, Alpha-Numeric Display System shown here using monitors by **Electrohome**.

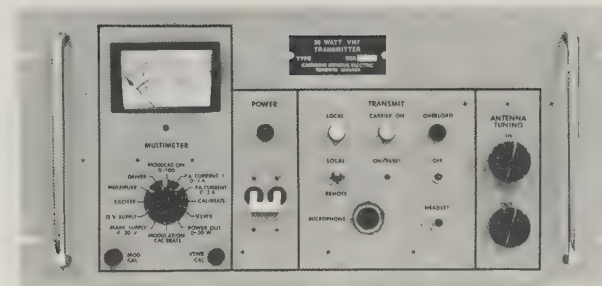

The WAND is a new way to provide the fast, accurate communication so vital to any transportation system. Information can be quickly communicated to anyone within viewing range of the monitors. In terminals, offices, maintenance areas, or warehouses, WAND's visual messages are more effective than a public address system, which has to compete with other noise.

WAND is used for arrival/departure and fare information, reservation data, weather reports, weight distribution data, traffic control, crew schedules and other information.

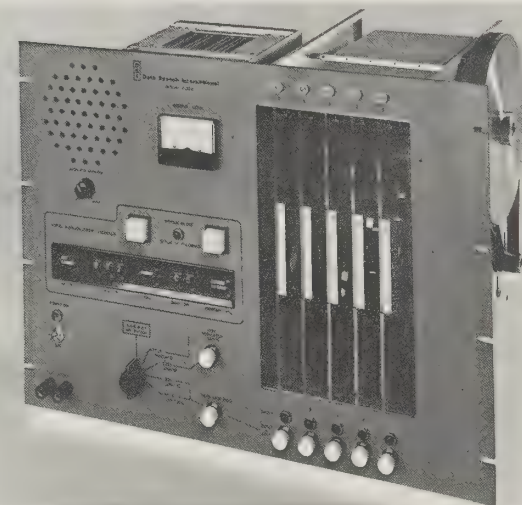

Electrohome makes a variety of sizes of monitors to the exacting standards of the communication and surveillance industries.

Mathews also manufactures the CRESFLIGHT luggage distribution loops offered in a variety of configurations.

Canadian General Electric also manufactures voice communication systems such as this 20W, V.H.F. solid state, A.M. transmitter for use in ground to air communications.

Data Speech International offers equipment for Transcribed Weather Broadcasts, Automatic Arrival and Departure Broadcasts, also Display Boards, Ticket Counters and Boarding Systems.

ONTARIO EXPORTS

Ontario products have developed world-wide recognition for their excellence. Expertise developed to meet special Canadian requirements, combined with Ontario's ability to price and deliver abroad competitively, has established this province as the active marketplace of Canada.

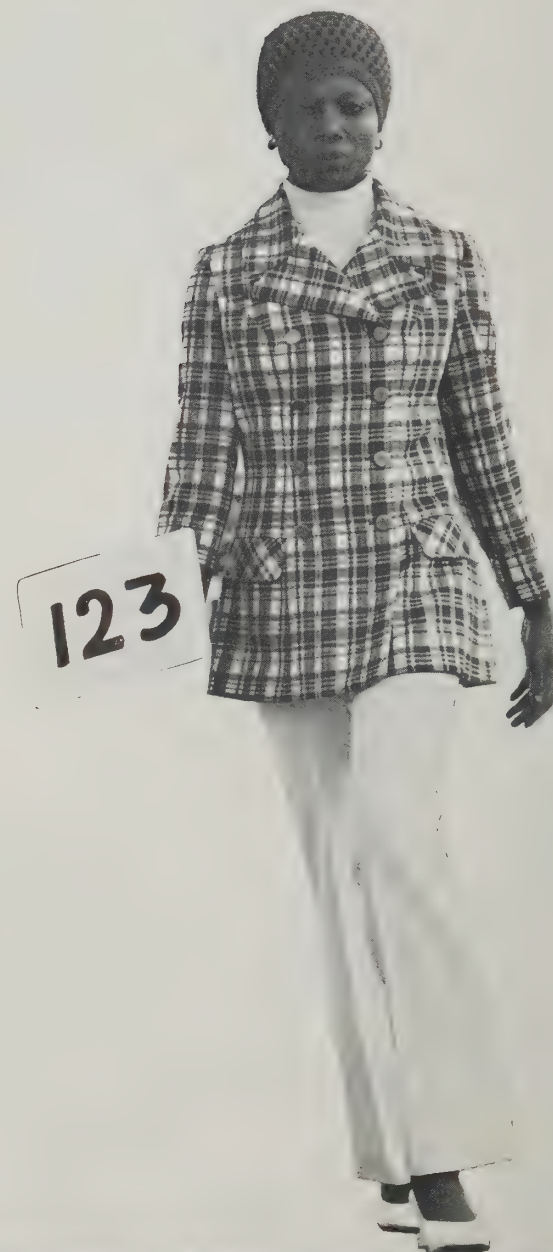

The scope of Ontario industry is limitless. Raw materials, transport facilities, the skill of its artisans, the desire and ability to meet a challenge — all these make Ontario suppliers and their products worthy of serious consideration.

These factors, plus modern air, sea, road and rail transportation assure service and delivery to meet any urgency.

The following pages illustrate the scope and diversity of manufactured goods and services available from Canada's industrial heartland.

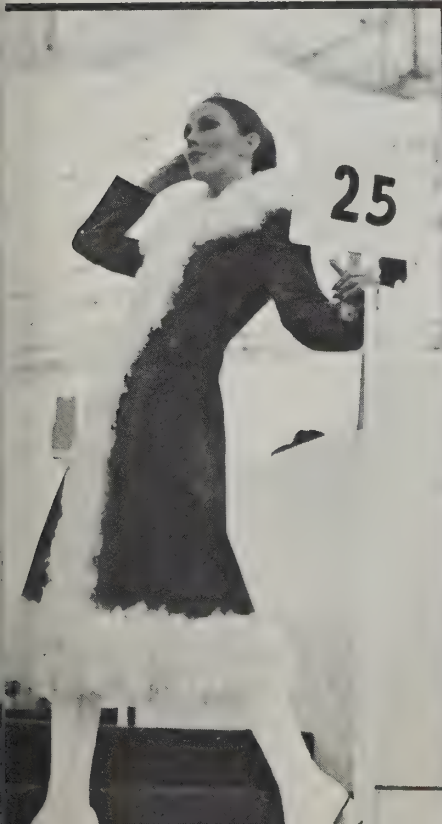

FASHION

Design, quality and competitiveness are the major ingredients for successful exporting. Combining these ingredients effectively, the Ontario garment industry is exporting to many countries throughout the world.

Men's, women's and children's fashions find immediate acceptance. Ready-to-wear, furs, leathers and textiles of excellent quality and imaginative design are available for world marketplaces.

These fashions shown at the Eedee Fashion Awards presentation, sponsored by the Ontario Department of Trade and Development, highlight the versatile creativity of Ontario's fashion designers and manufacturers.

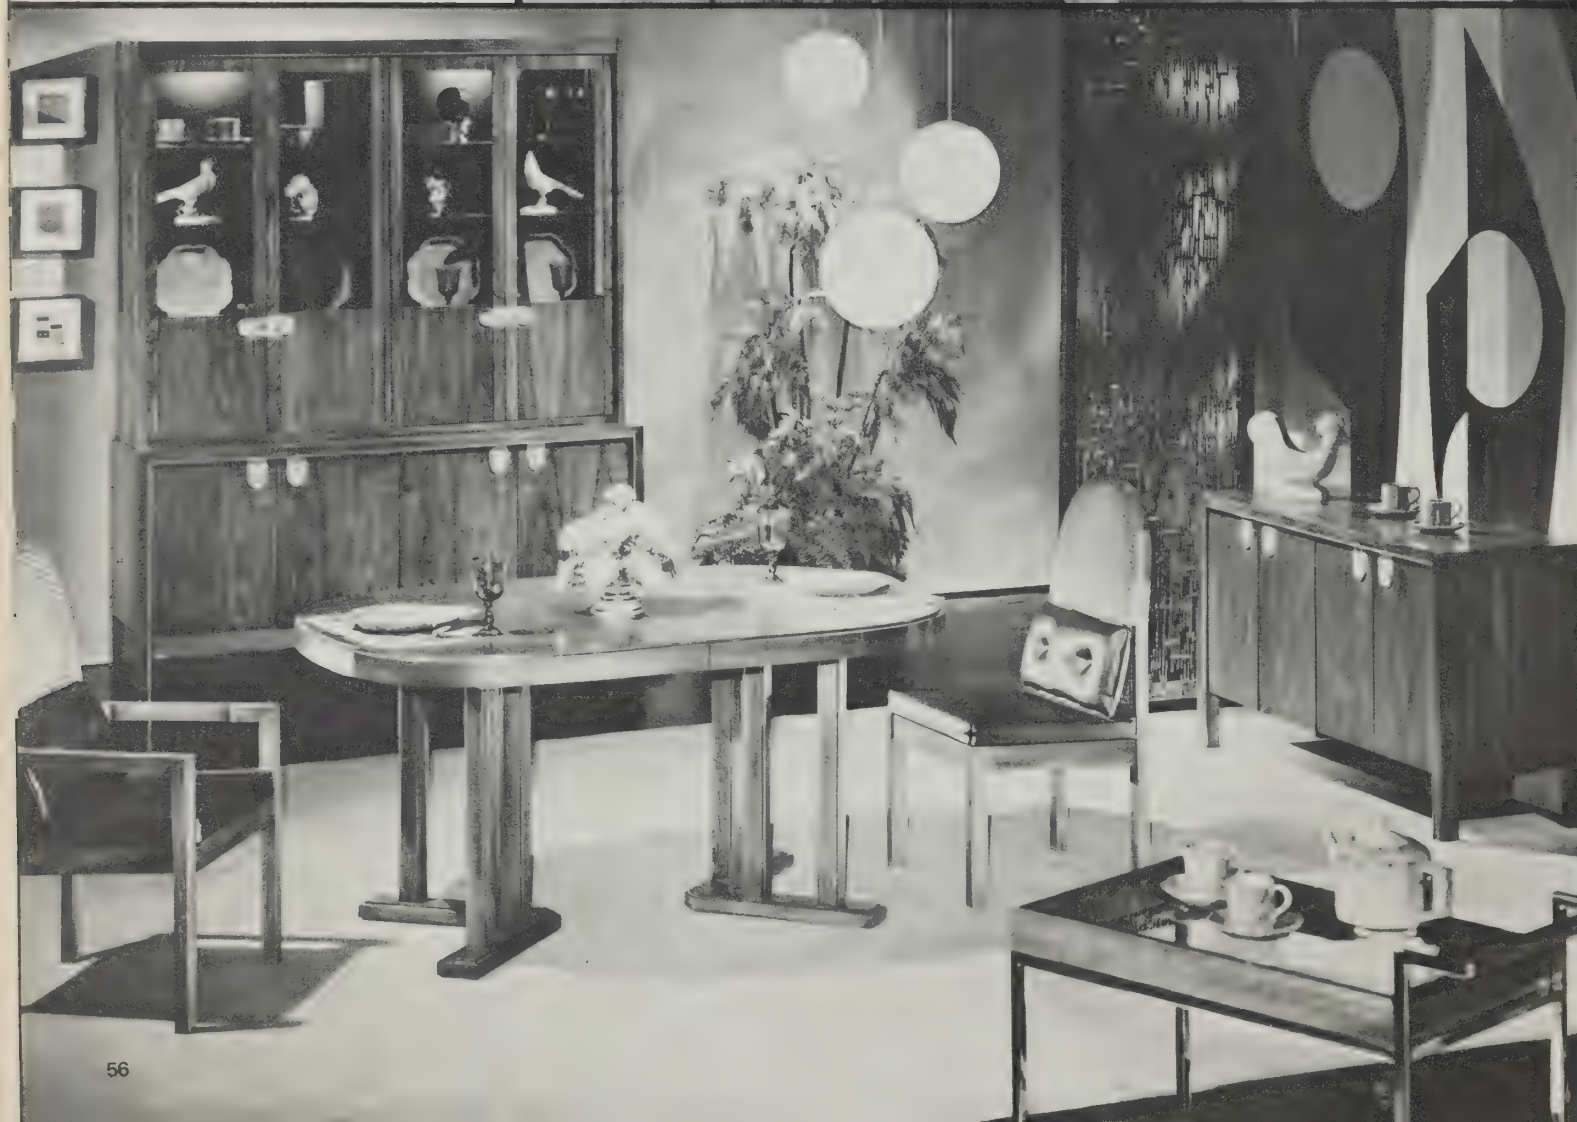

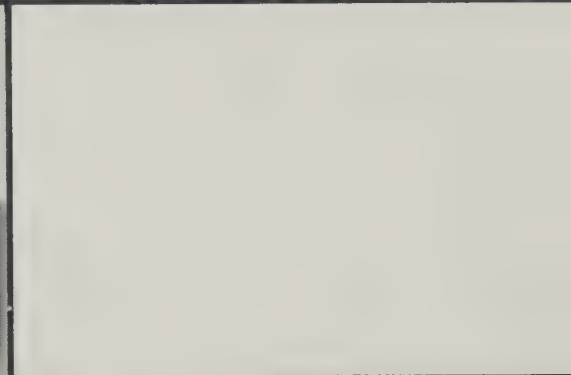

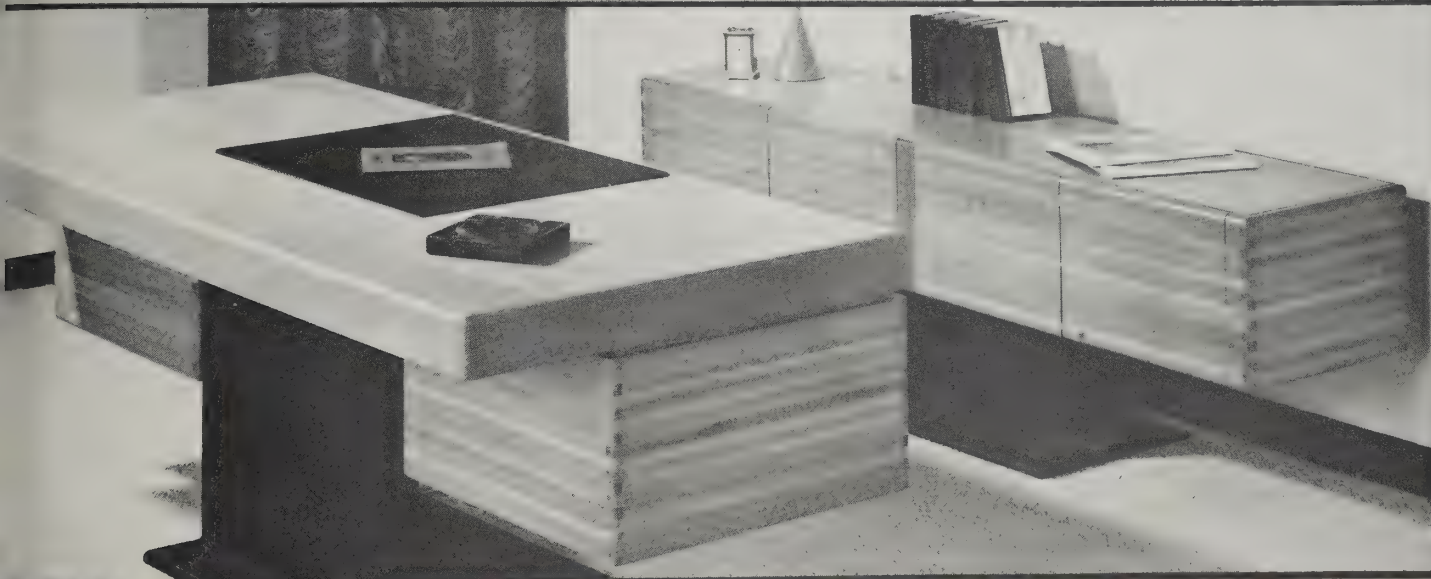

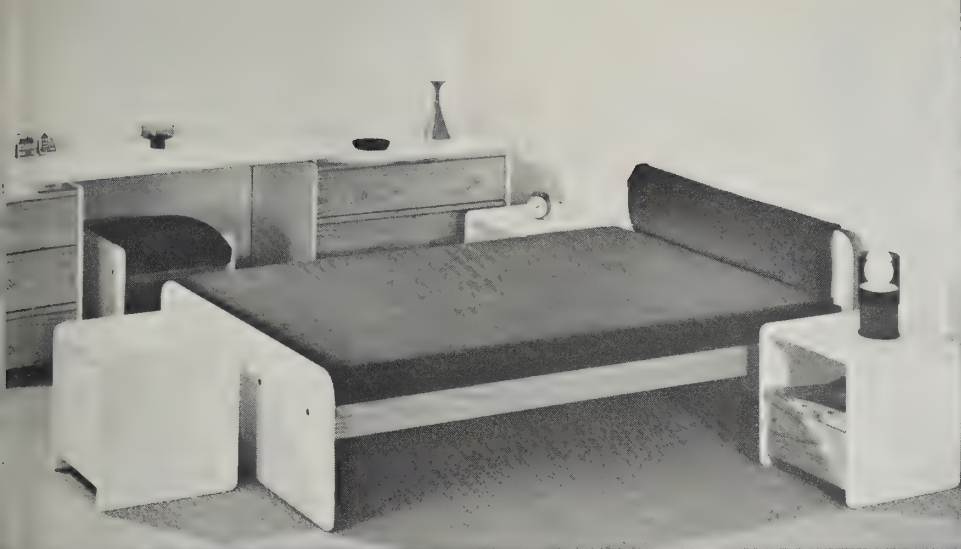

With contemporary designs and advanced production techniques, Ontario furniture manufacturers are confident of product acceptability and competitiveness in export markets.

Industrial design from Ontario is acknowledged and accepted by universities, colleges, hospitals and other institutions in North America and overseas. A rapid expansion of export markets permits production runs of new designs.

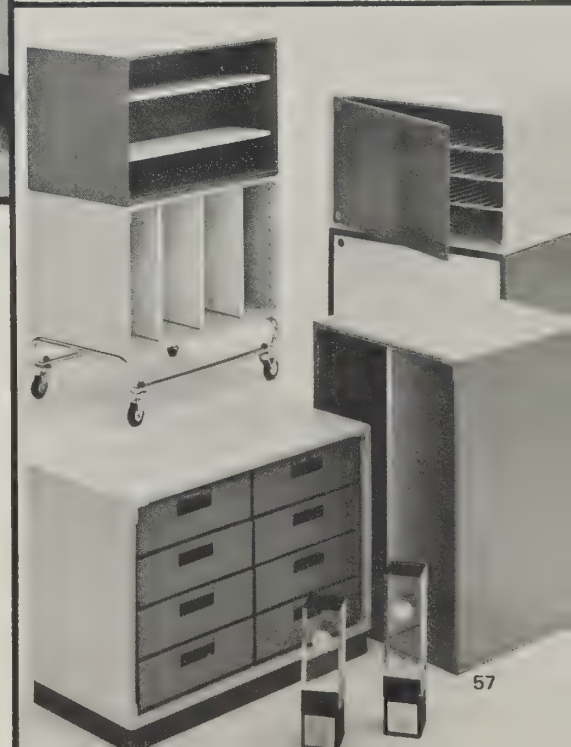

The Ontario Government-sponsored EEDee Furniture Award program encourages creativity of design and application of new materials and technology.

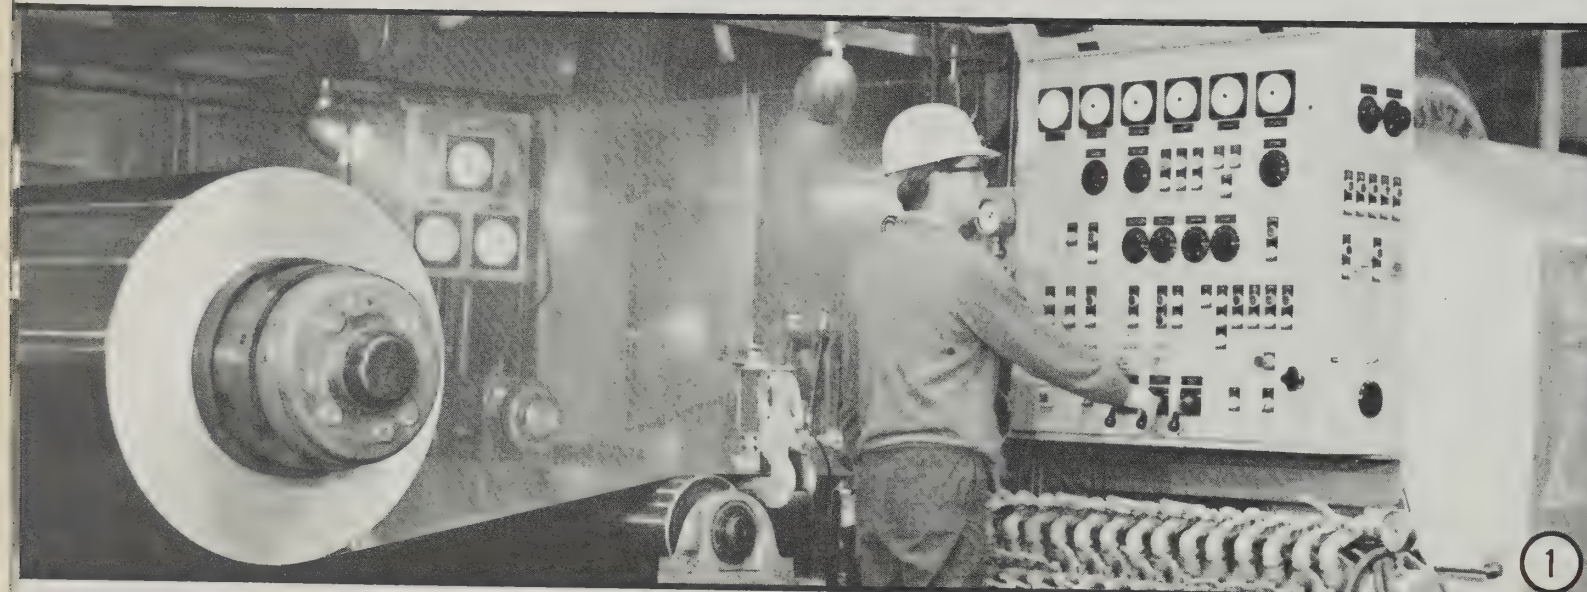

Examples of Ontario-produced furniture groups are pictured here, including Eedee Furniture Award submissions. An illustrated brochure on Ontario furniture is available from the Marketing Branch, Department of Trade and Development.

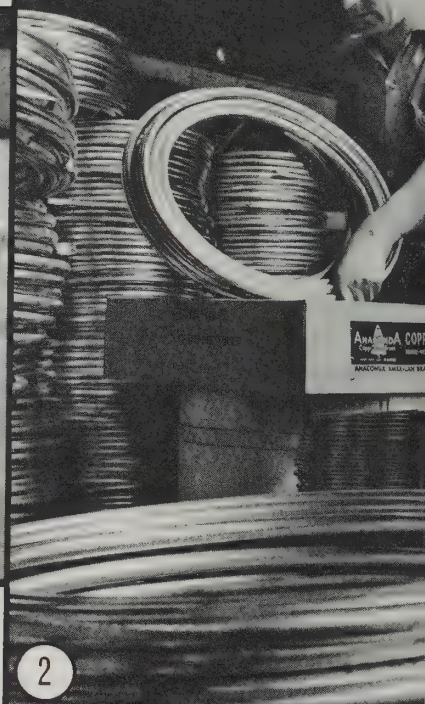

HOME FURNITURE AND CONTRACT FURNITURE

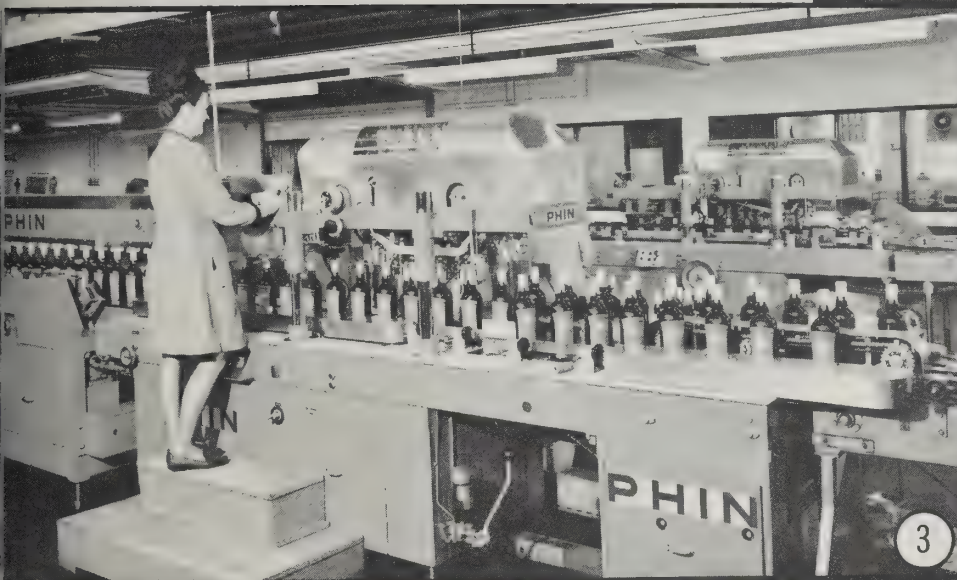

1

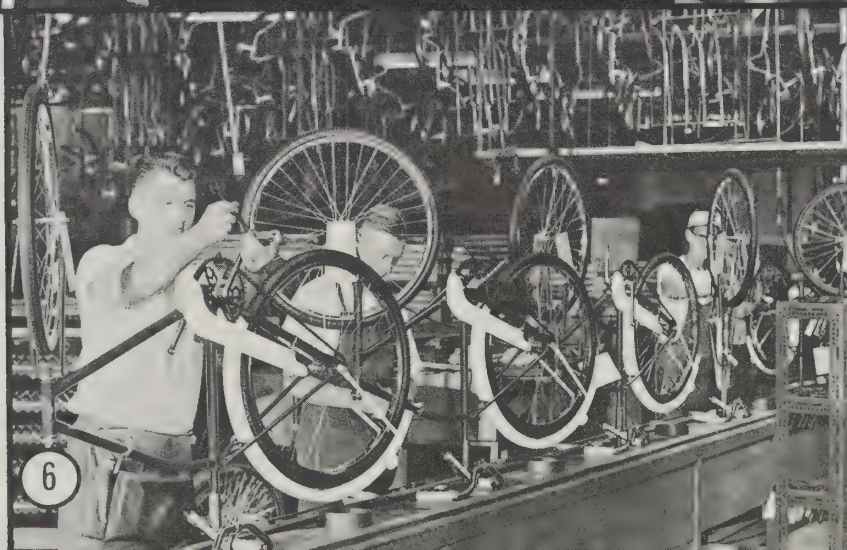

2

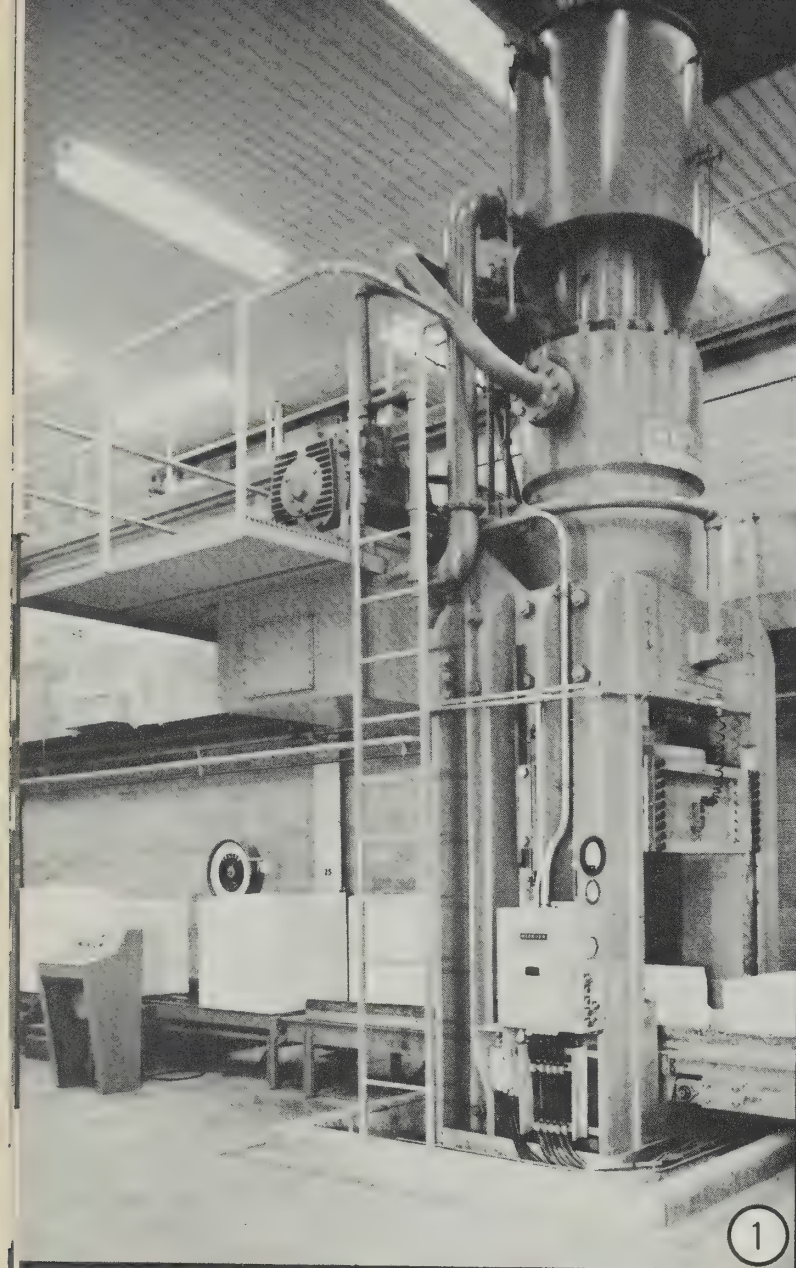

GENERAL MANUFACTURING

1. Aluminium foil being cold rolled in a 58" mill of Canada Foils in Bracebridge.
2. Copper tubing — one of a variety of products manufactured in the large Anaconda Plant in Toronto.
3. Ontario made automatic labelling machine at work in Scotland.
4. A sample from the wide variety of jewellery and giftware items made in Ontario.
5. Applying the finishing touch to ice skates.
6. Bicycles for export on C.C.M.'s final assembly line.

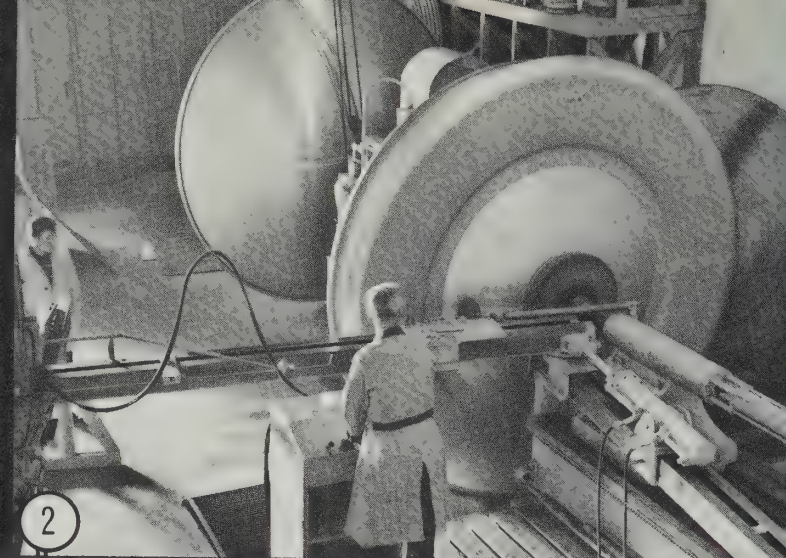

Ontario has a widely diversified general manufacturing industry: products to assist in making your manufacturing more efficient and products to improve your recreation and living standards.

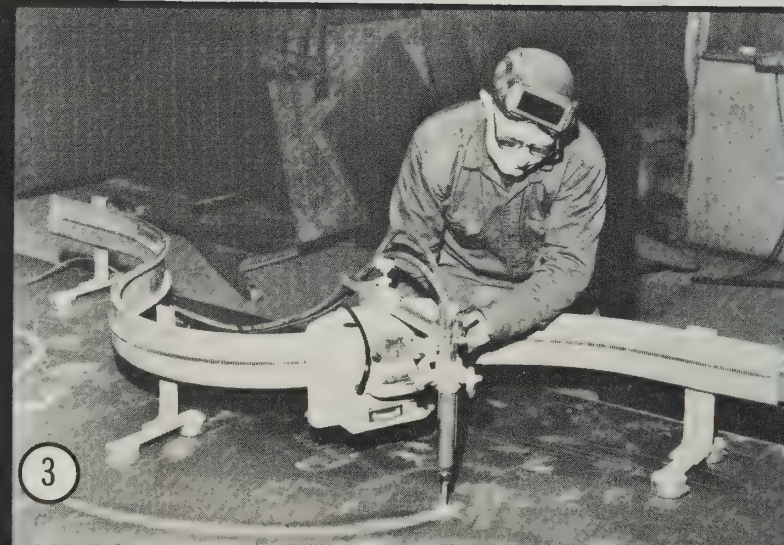

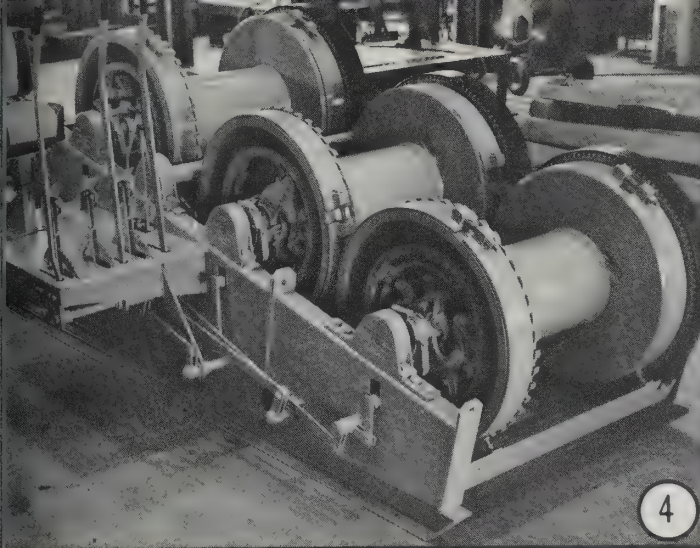

1. Pulp baling press, made in Ontario, installed and operating.
2. Manufacture of large aluminium spinning in a West Toronto factory.
3. Torch cutter and template shaping plate for future fabrication.
4. Industrial hoist ready for packing and shipping abroad.
5. 150 ton ore moving truck manufactured in Ontario for mines throughout the world.
6. Ontario made mobile gas compressor unit in operation in Western Canada.
7. Heavy duty shear and tandem leveller machine — manufactured for export.

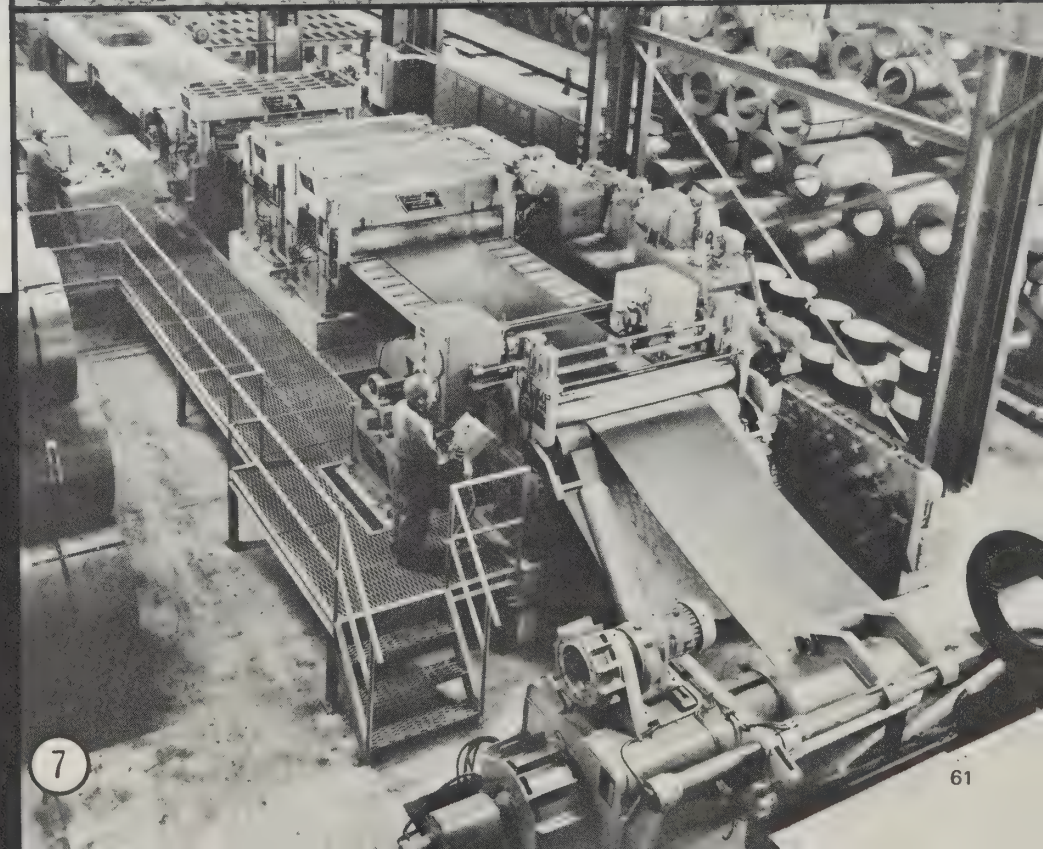

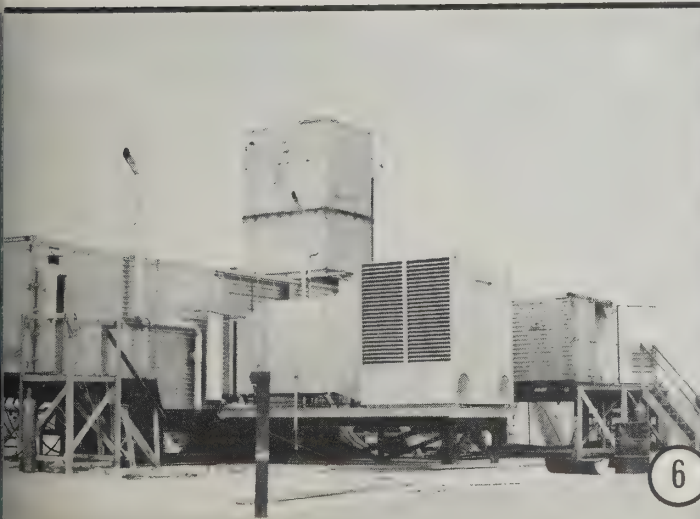

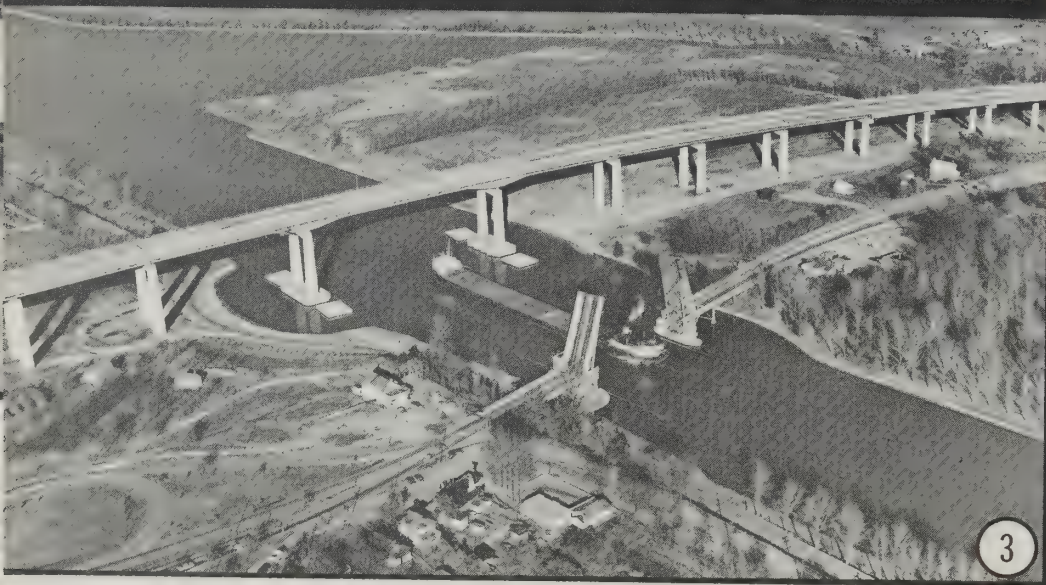

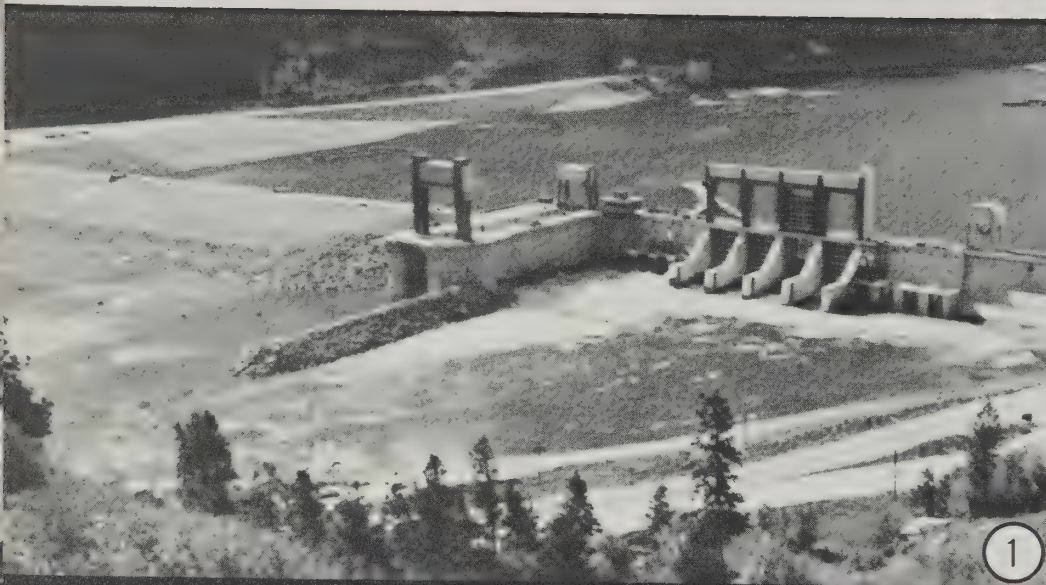

HEAVY MACHINERY

Ontario heavy machinery manufacturers are well established as suppliers of capital equipment for all industries. Heavy duty and special purpose vehicles, prime movers, power sources and production equipment are in operation throughout the world.

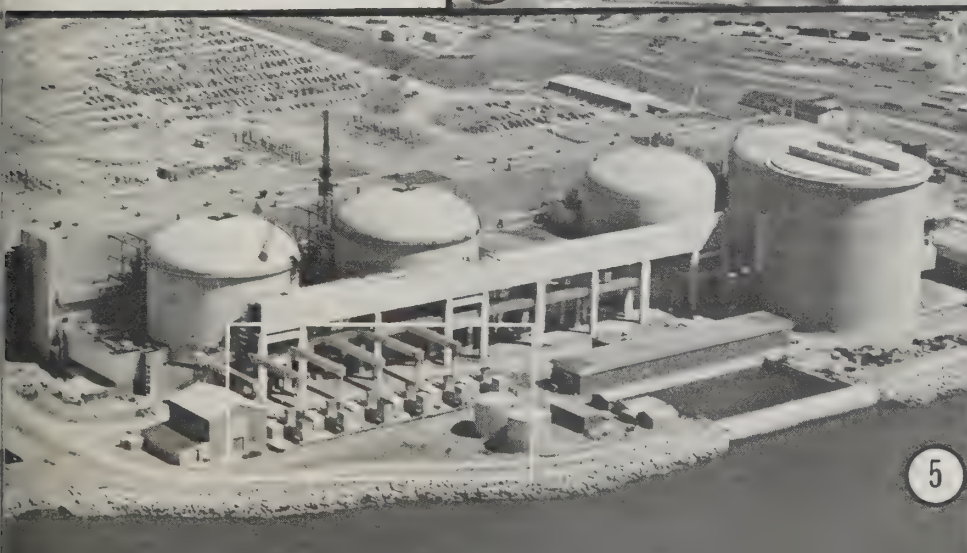

ENGINEERING SERVICES

Ontario architects, engineering consultants and contractors stand ready to share their expertise and knowledge in all areas of design and construction. Bridges, power plants, utilities, airports etc. throughout the world demonstrate Ontario engineering capability and achievement.

6

5

1. Arrow Dam, Washington State, was designed in Ontario.
2. Ontario engineers supervising steel making equipment being installed in Africa.
3. Modern bridge design and construction over the Welland Canal.
4. Prototype solid waste reduction unit under construction at Hamilton, Ontario.
5. Ontario Hydro's Nuclear Generating Plant at Pickering, Ontario, showing Ontario designed and manufactured standby gas-turbine power units (in foreground) for station services or peak duty requirement.
6. English steel mill engineered and built by Ontario firm.

TRANSPORTATION EQUIPMENT

The demands of Ontario transportation, from the rugged requirements of the north to the sophistication of southern metro areas, combined with Canada's wide weather variation, have resulted in a unique range of vehicles that meet world-wide requirements.

Automobiles, heavy duty trucks, all terrain amphibious vehicles, subway, commuter, and railroad cars, are in service in many foreign countries.

FOODSTUFFS

Ontario is the breadbasket of central Canada, with vineyards, livestock, dairy products and quality crops to rival the world's best.

Food and agricultural exports from Ontario include cheese, meats, tobacco, fresh and canned vegetables and fruits, juices, wines, honey.

Export of frozen portion meats, frozen fish, baked goods, candies, light beverages, liquors, beers, indicates the wide range of processed Ontario foods winning favor in many markets in 25 countries.

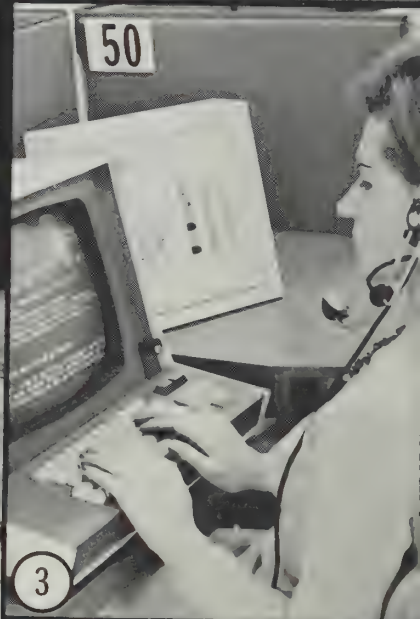

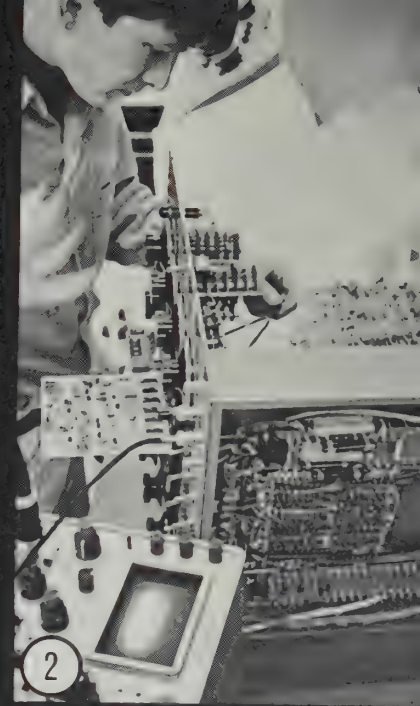

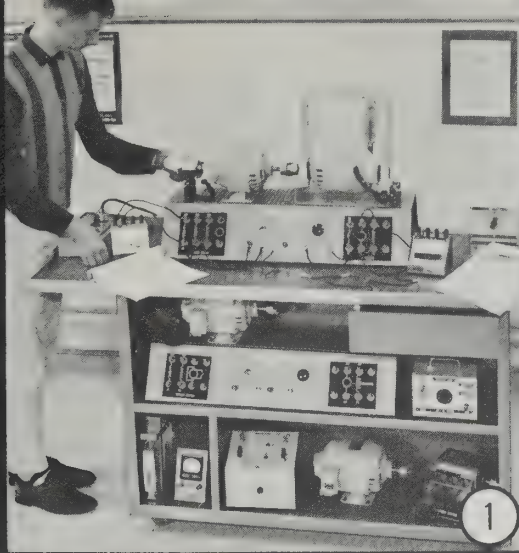

ELECTRONICS

Ontario industry has outstanding expertise in many areas of electronics from miniature "microcircuits" through home entertainment products, sophisticated geophysical instruments, complex industrial control systems and satellite communications. Ontario-made electronic products are to be found in use in all countries of the world, from the deepest mines to the highest flying aircraft and in satellites.

1. At Litton Systems, inertial navigation systems are produced in "clean rooms".
2. Computer assembly under test.
3. Raytheon airline reservation systems are used by many airlines.
4. Intricate assemblies are produced with rigid quality control.

1. Vocational training equipment (electrical) by Electronic Controls Ltd.
2. Nature study using parabolic microphone by Dan Gibson Productions.
3. Primary grade children playing musical instruments by Educational Musical Instruments.
4. SEF interior.

EDUCATION

All types of educational products are available from Ontario industries. The education program has made great advances in the modular system of school construction using movable partitions, special ceilings, lighting, furniture and services. Ontario architects offer these same design concepts to other markets. A separate brochure is available depicting the wide variety of education products.

1

2

3

5

4

AIRPORT EQUIPMENT

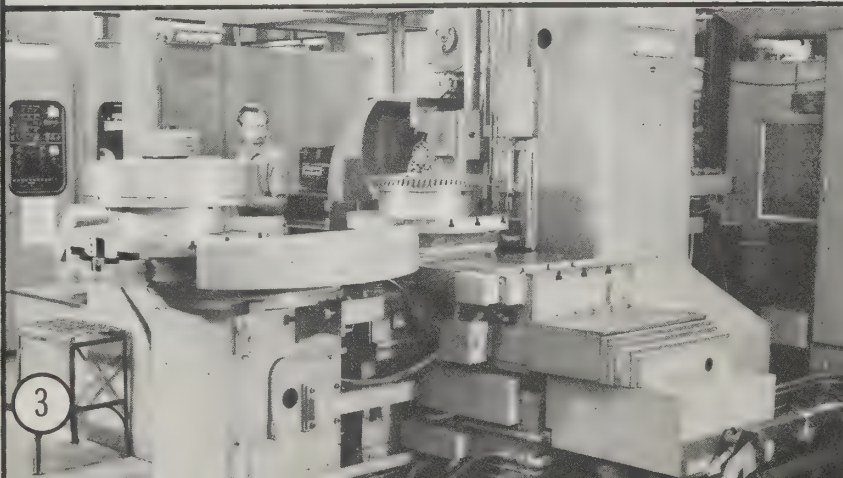

The Ontario aircraft industry has extensive experience in design, production and service in the aerospace industry. Navigation equipment, flight recorders, crash position indicators, training simulators, sub-contract parts, engines and airframes are all available from Ontario manufacturers.

1. Skykeesh transportable A.T.C. cab.
2. Radar bright display by Raytheon.
3. Air traffic control complex at Toronto International Airport.
4. Flight arrivals-departure display byadian Westinghouse.
5. Luggage carousels by Mathews Co. Co. Ltd.

AIRCRAFT AND AIRCRAFT EQUIPMENT

Ontario industry offers a complete range of airport equipment and services including masterplanning, engineering, construction of buildings and facilities, supply and installation of visual aids, navigational aids, baggage handling, maintenance vehicles, reservation systems, furnishings and other items.

1. Membrane tank water bomber being demonstrated.
2. DHC 4 Caribou transport in service over Toronto International Airport.
3. Sub-contract gas turbine engine parts produced by sophisticated machine tools in Ontario.
4. Series 300 Twin Otter aircraft for export delivery.

2

3

1

4

FOREST PRODUCTS

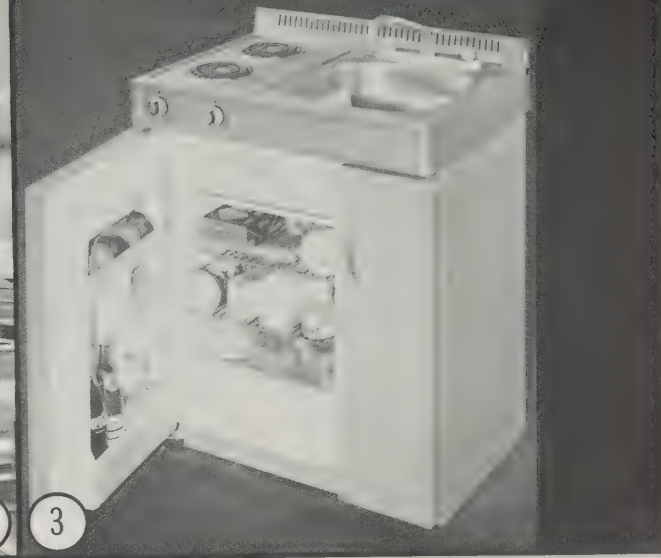

Ontario produces giant tree harvesting and transportation equipment for export — and products such as beaver furs and snowshoes for individual wear. A finished product from the forest, Ontario-made newsprint, is in use throughout the world.

1

2

3

HOTEL, MOTEL AND RESTAURANT EQUIPMENT

Ontario designers, manufacturers, architects and consultants
meet the broad spectrum of demands of hotel construction.

6

4

5

1. The sky's the limit in new hotel architecture.
2. Stainless steel hotel kitchen equipment manufactured in Ontario.
3. Compact combination unit for efficient apartment living.
4. New design concepts for modern living.
5. The decor of a dining room enhanced by Canadian products.
6. A demonstration of advanced construction methods in use building a Toronto motel.

SAILBOATS, YACHTS AND POWERBOATS

Ontario produces international champion racing craft such as "Sorcery" from C&C Yachts which won Annapolis Newport race, and SORC race 1971 in a fleet of over 200 boats.

All forms of pleasure craft are produced including powerboats, houseboats such as the "Hobo" from Pamco, outboards, rowboats and canoes.

Specialized craft such as the Spectra 1 by MHV Industries and various all terrain vehicles are produced and exported world wide.

Hotel Motel Restaurant

Services and Supplies from Ontario

Canada's remarkable growth in the last decade, coupled with the Canadian love of motor travel, has stimulated the development of a hotel supplies industry second to none.

Throughout this vast land, many thousands of new hotel, restaurant and tourist facilities have opened for the comfort of the Canadian traveller and vacationer. Canadians now enjoy modern accommodations and services in every one of the ten provinces.

These up-to-date supplies and services, this Canadian expertise in hostelry includes participation in many major hotel expansions around the world.

A wealth of experience in this field is now offered for your convenience by more than 200 architects, engineering consultants, construction companies, equipment manufacturers and service industries. This group represents a joint industry-government organization, and provides a complete package proposal . . . any item for anywhere in the world . . . a unique achievement.

The group furnishes programs in feasibility; management; architectural design; construction, equipment and supplies of all types.

The government of Canada will help you with export, financial, exchange and insurance arrangements. It will also provide technological services planning and design in co-operation with consultants and planners.

Canada's Hotel for Export program will enable you to modernize and improve your needs for new and expanded business.

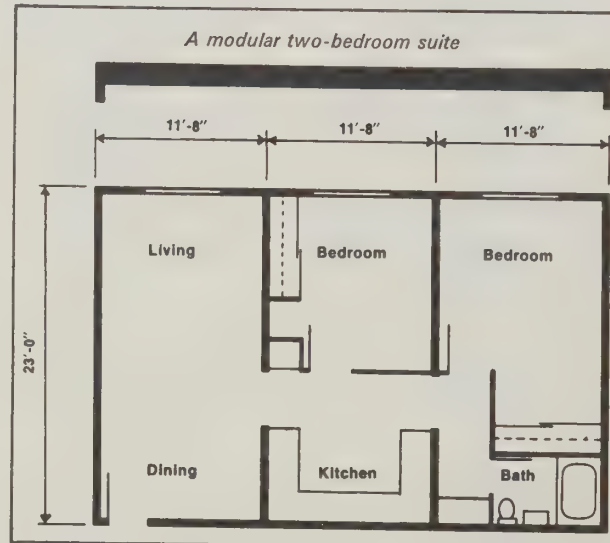

Concrete Modular Construction Systems

Permanent modular construction in lightweight concrete creates a new and flexible system technology. This stable, permanent, high-strength concrete is chemically self-stressed in all three directions.

Modular construction permits labor-saving, high-rise building, and results in a lightweight, strong structure:

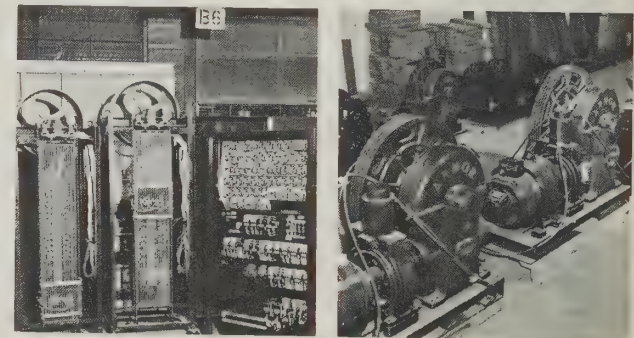

The mechanical system allows for heating, air conditioning, plumbing and electrical connections.

Elevators

Modern elevator systems are available in a wide range of types, sizes and speeds from Canadian suppliers.

Automatic operation and up-to-date control systems (above) are important features.

Elevator loads are supported by the pit floor and thus expensive wall-shaft construction can be avoided.

Power units (above right) can also be supplied for basement mounting adjacent to/or at the rear of the shaft.

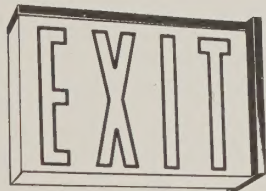

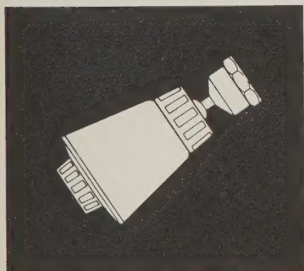

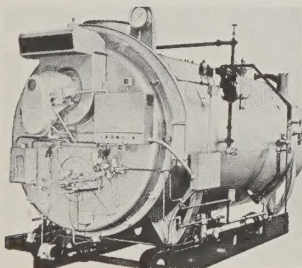

Communication Systems

Inter-communication systems between hotel rooms, service areas, and a main communicating unit are offered for varying types of large and small installations.

Modern telephone units are available from Canadian suppliers.

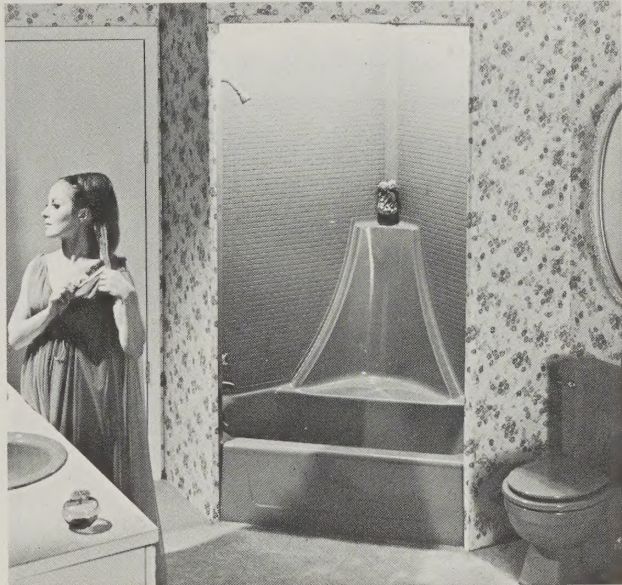

Heating, Plumbing and Electrical Services

Bath and Shower Units

A remarkable new combination tub and shower in an upright shower stall unit is the latest in Canadian bath innovations. It is moulded in one piece.

Bathroom fixtures are offered in a pleasing array of permanent colors.

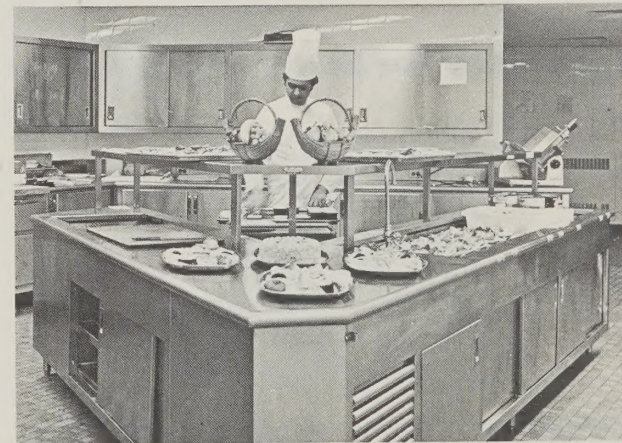

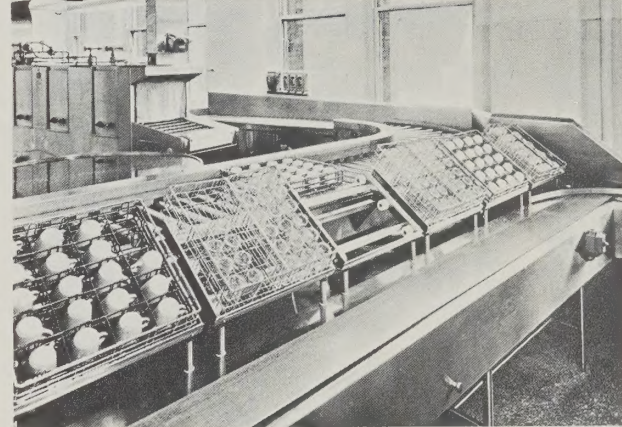

Removable Sound Barrier Walls

Removable room dividers, folding and sliding walls, help to convert areas into larger or smaller rooms for group meetings. They provide ease of installation and easy convertibility.

Walls are custom built to suit conditions required, and can be supplied fitted with doors.

Catering Units

Well-designed catering equipment units for efficient and streamlined kitchen service have proved themselves in Canadian installations.

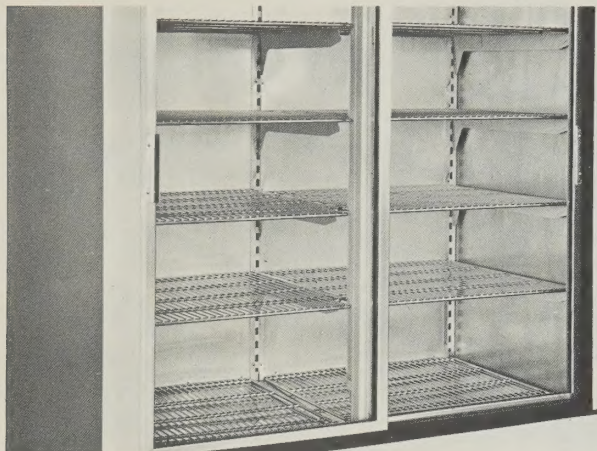

Durable metal units combine ease of cleaning and handy service facility. A wide range of styles and designs is available to fit the needs of any serving area.

Completely automatic cooking equipment has the fastest heating elements available, including infra-red and thermostatic controls.

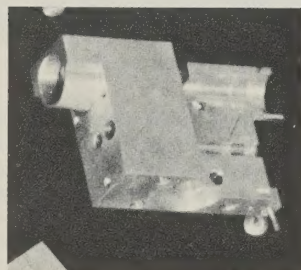

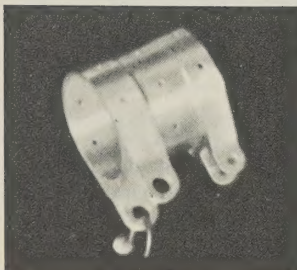

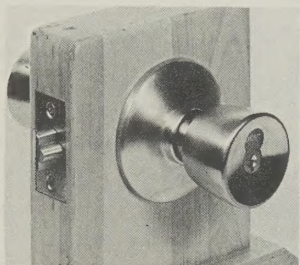

Refrigeration and Storage Units

Refrigeration units in many convenient sizes are adapted for interior fittings to meet every requirement and can be easily converted into heated or refrigerated cabinets to meet fluctuating seasonal needs.

Self-service merchandiser units feature fluorescent lighting in display areas and sliding glass lids.

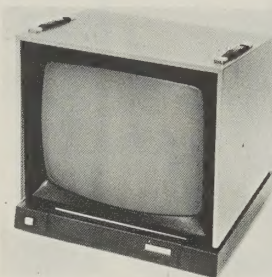

Hardware for Every Purpose

Some Canadian Services and Supplies

Architecture and design services
Engineering and consulting services
Project and operation management
Studies and construction
Furniture for every purpose
Office equipment
Lighting fixtures
Food preparation equipment
Refrigeration, storage units
Heating or cooling systems
Communication systems
Bar equipment and dispensers
Hardware for all purposes
Materials, fabrics and finishes
Elevator and conveyor units
Electronic systems, television, radio sets
Bathroom fixtures, plumbing

Canadian companies
supply television sets
for hotel rooms.
